From Static Signs to Smart Displays

Real-Time Passenger Information

Would you like to provide accurate information?

Public transport is a key component of every community, so providing reliable information to residents is essential. With e-paper-based SmartPage displays, you can support travelers with accurate and real-time timetable data for efficient journey planning.

Dynamic Passenger Information

Passengers can view real-time arrival information. A single device can manage routes from multiple transport operators.

Accessible Experience

The accessible user experience is enhanced by remote-control operation, multi-language support, and a text-to-speech function with adjustable volume.

Local Information

Efficiently inform residents about local news and events. Multiple types of content can be scheduled and displayed in sequence on a single screen.

Sustainable Operation

Off-grid operation and a built-in battery ensure long service life. Solar-powered operation is also available.

Easy Installation

Can be quickly and easily mounted on a pole or wall, delivering immediate, visible results for your community.

Durable and Weatherproof

Designed for outdoor use, the device features a robust, easy-to-clean enclosure that withstands extreme weather conditions.

Modern Appearance

Manufactured in your chosen size and color. Its streamlined, modern look enhances the appeal and overall image of your community.

Design, development, production and support in one hand

SmartPage
BY HC LINEAR
